Details

H&M is hiring for the role of Data Analyst!

Responsibilities of the Candidate:

- Main focus is the data analyst scope of the product/program/team where you are expected to contribute to the short- and long-term agenda.
- Data discovery, building data products, testing and evaluating model outputs, in collaboration closely with other roles in the product/team, i.e., DS, DE, Business Expert, and Business teams.
- Solving complex problems by turning vast amounts of data into business insights through advanced analytics and effectively communicating findings to a variety of stakeholders.
- Framing the problem together with stakeholders, exploring large data sets; preparing data for own analysis.
- Creating and maintaining documentation related to your work to ensure that stakeholders have the necessary information to understand the data & analysis input/outputs.
- Sharing knowledge in Communities of Practice, thereby enriching the collective understanding and fostering a culture of continuous learning

Requirements:

- Degree or relevant experience in Statistics, Engineering, Business, or a related field
- Proficient in SQL; experience with Python/R is a plus
- Proficient in Excel and experience in BigQuery. Previous knowledge of the GCP ecosystem is an advantage.
- Skilled in data visualization (e.g., Power BI) and statistical analysis
- Strong communication and teamwork skills

If an employer asks you to pay any kind of fee, please notify us immediately. Unstop does not charge any fee from the applicants and we do not allow other companies also to do so.
