Details

### Ascendion is hiring for the role of Data Scientist!

#### Responsibilities of the Candidate:

- Collect, clean, and analyze large datasets from various sources.
- Develop and deploy machine learning models and predictive algorithms.
- Identify trends, patterns, and anomalies to support business decision-making.
- Create dashboards, reports, and visualizations to communicate insights clearly.
- Work closely with stakeholders to understand business needs and translate them into data solutions.
- Perform A/B testing, hypothesis testing, and advanced statistical analyses.
- Collaborate with engineering teams to integrate models into production systems

#### Requirements:

- Strong experience with Python or R, and data libraries like Pandas, NumPy, Scikit-learn, etc.
- Hands-on experience with SQL and database management.
- Good understanding of machine learning algorithms, statistical methods, and data mining techniques.
- Proficiency in data visualization tools (e.g., Tableau, Power BI, or Matplotlib/Seaborn).
- Experience with big data tools (e.g., Spark, Hadoop) is a plus.
- Excellent problem-solving and communication skills.

If an employer asks you to pay any kind of fee, please notify us immediately. Unstop does not charge any fee from the applicants and we do not allow other companies also to do so.
