Details

**Microsoft is hiring for the role of Software Engineer!**

**Responsibilities of the Candidate:**

- Works with appropriate stakeholders to determine user requirements for a feature.

- Supports identification of dependencies, and the development of design documents for a product feature with oversight.

- With guidance, learns to create and implement code for a product, service, or feature reusing code as applicable.

- Assists and learns about breaking down work items into tasks and provides estimation.

- Acts as a Designated Responsible Individual (DRI) in monitoring system/product feature/service for degradation, downtime, or interruptions for simple problems, and recommends actions to restore system/product/service by following the playbook.

- Reviews current developments and proactively seeks new knowledge that will improve the availability, reliability, efficiency, observability, and performance of products while also driving consistency in monitoring and operations at scale.

**Requirements:**

- Ability to meet Microsoft, customer and/or government security screening requirements are required for this role.

- These requirements include, but are not limited to the following specialized security screenings:

If an employer asks you to pay any kind of fee, please notify us immediately. Unstop does not charge any fee from the applicants and we do not allow other companies also to do so.
